

AI ENABLED IMAGE PROCESSING

GOLDAUDIT AI CONTENT VALIDATION

A high-performance content verification and checking solution using AI to analyse and flag content not conforming to rules-based filtering (copyright, obscene, prohibited etc.). The solution constantly learns and adapts to improve accuracy over each iteration.

FEATURES

- Allows validation of image, video and text content against regulatory and business requirements
- Neural network iteratively adapts and learns each execution
- Very high processing throughput

- ✓ No trademark or logos
- ✗ No violence
- ✓ No sexual content
- ✓ No religious symbols

PAIN POINTS

- Impossible to manually check large volumes of content
- High risk of false-positive approvals when done manually

KEY BENEFITS

- ✓ Reduce manpower costs and significantly increase efficiency and accuracy
- ✓ Improve service quality
- ✓ Multi-dimensional image screening
- ✓ Stricter risk control

ID PHOTO OPTIMISER

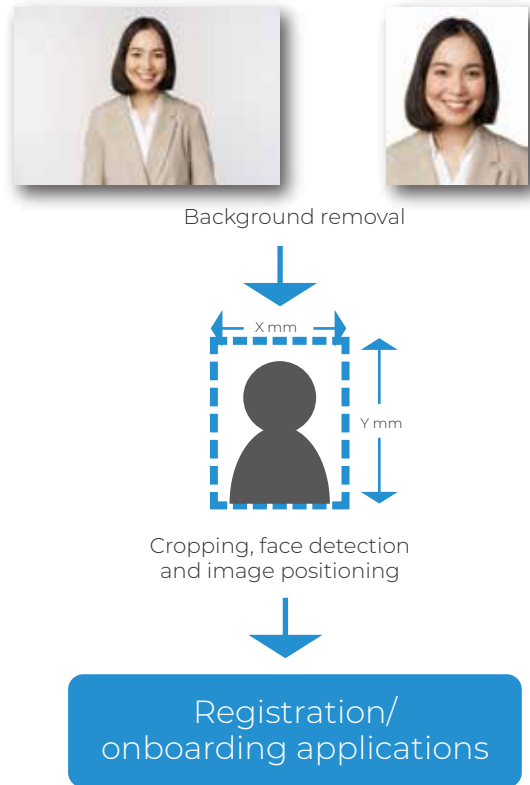

AI Image processing to automatically edit photos for eKYC photo ID applications.

FEATURES

- One-click optimisation of photos for eKYC applications
- Automatic background removal
- Automatic image enhancement
- Automatic face detection for correct image

USE CASES

- Government online passport or identity card application process
- Photo validation for creating new staff cards

AI PHOTO GENERATION FROM TEXT

Bring your imagination to life simply by describing your visuals through text. The AI image generator can convert text input into stunning illustrations, which can be used together with Goldpac's **Hummingbird desktop printer** to create DIY design cards, conveniently offering consumers a one-of-a-kind product without added workload or headcount.

Fluffy puppies holding cotton candy and dancing in a disco in space...
